

Dear Residents of Assiginack;

The Township of Assiginack continues to take measures in an attempt to prevent COVID-19 from coming here. All Township facilities are currently closed to the public, but communications are open by email and phone. Procedures are in place to ensure all municipal essential services are ongoing during this unprecedented time. Staff are working from home as much as possible and those that are in the Township office are rotating on a weekly schedule.

The emergency management team is communicating regularly, monitoring and responding to all information as it becomes available. At this time, Council meetings are being held via video conferencing.

On behalf of our residents, Council and staff, I want to express our absolute respect and gratitude to all front-line health workers in all the health services. We wish them and their families well and please be safe.

I further want to express our gratitude to the complete retail community for their continuous effort to ensure all important supplies such as medicine, food, banking and many other needed services are available to our residents.

You, the residents of Assiginack, have a huge responsibility in this challenging time! Your effort to protect our community by doing the right things is imperative to help end this virus. It is absolutely mandatory that we practice social distancing and self isolation and follow all government guidelines - we can't stress this enough and how important it is. Watch our website and local media for information.

Please be kind, help each other and be safe. Please have patience with everyone around you. Remember, we are all in this and if we continue to work together, we will come out of this a stronger community.
Stay safe, stay healthy!

Mayor Ham and Council
