THE CORPORATION OF THE TOWNSHIP OF ASSIGINACK COMPREHENSIVE ZONING BY-LAW

HOW TO USE THIS BY-LAW

Introduction

These pages explain the purpose of this Zoning By-law and how it should be used. These pages do not form part of the Zoning By-law passed by Council and are intended only to make the Zoning By-law more understandable and easier to reference.

Purpose of this Zoning By-law

The purpose of this Zoning By-law is to implement the policies of the District of Manitoulin Official Plan. The Official Plan contains general policies that affect the use of land throughout the Township. These policies specify where certain land uses are permitted and, in some instances, specify what regulations should apply to the development of certain lands.

The statutory authority to zone land is granted by the Ontario *Planning Act*. The *Planning Act* specifies what a By-law can regulate. A Zoning By-law can:

- prohibit the use of land or buildings for any use that is not specifically permitted by the By-law;
- prohibit the erection or siting of buildings and structures on a lot except in locations permitted by the By-law;
- regulate the type of construction and the height, bulk, location, size, floor area, spacing, and use of buildings or structures;
- regulate the minimum frontage and lot area of a parcel of land;
- regulate the proportion of a lot that any building or structure may occupy;
- regulate the minimum elevation of doors, windows or other openings in buildings or structures;
- require parking and loading facilities be provided and maintained for a purpose permitted by the By-law; and,
- prohibit the use of lands and the erection of buildings or structures on land that is:
 - Subject to flooding;
 - The site of steep slopes;
 - Rocky, low-lying, marshy or unstable;
 - Contaminated;
 - A sensitive groundwater recharge area or head water area;
 - The location of a sensitive aquifer;
 - A significant wildlife habitat area, wetland, woodland, ravine, valley or area of natural and scientific interest;
 - A significant corridor or shoreline of a lake, river or stream; or
 - The site of a significant archaeological resource.

How to Use this By-law

In order to reference this By-law easily, a property owner should follow each of the steps listed below to determine what permissions apply to their particular property.

a) Locate the Property on a Map

Maps in a Zoning By-law are called 'Schedules'. The first step to using this By-law is to refer to the zone schedules that are attached to this By-law to determine in which zone category your property is located. The zone category will be indicated on the schedules by a symbol or abbreviation. For example, you may see a symbol such as "RU" beside your property. This would indicate that your property is within the "Rural" Zone. The zone symbols are explained in [Section 3.1](#) of the By-law.

b) By-law Amendments

A Zoning By-law is not a static document; it is amended over time as demands and policies governing land use change. Before proceeding any further, you should verify that your property is not the subject of an earlier Zoning By-law Amendment. While the Township strives to keep this By-law up-to-date, more recent amendments may not be included in the version of the By-law you are using. Staff at the Township will be able to assist you to confirm if your property has been subject to a more recent amendment.

c) Zone Provisions

The next step to using this By-law is to determine what uses are permitted on your property. [Section 6](#) of the By-law identifies the permitted uses and zone requirements for each zone in the Township.

The definitions in [Section 4](#) can assist you if you are not sure of the nature of a permitted use or how it has been defined for the purposes of this By-law. Uses which are not identified as permitted uses within a particular zone are not permitted in that zone.

You have now identified the zone in which your property is located and have identified what uses are permitted on your property. The next step is to determine what standards may apply to the uses on your property. [Section 6](#) of the By-law identifies the zone requirements for each of the zone categories in the Township including standards for minimum lot area, minimum frontage requirements, minimum yard requirements, maximum lot coverage for principal and accessory buildings, maximum permitted buildings height and in some cases, the minimum required landscaped open space on the lot.

d) General Provisions

Now that you are aware of the uses permitted on your property and the specific zone requirements that apply to those uses, reference should be made to the General Provisions Section of this By-law. [Section 5](#) contains a more general set of standards known as 'General Provisions' that apply to all properties in all zones throughout the Township. For example, the General Provisions contain standards that regulate the location of accessory structures on a lot and height requirements, as well as providing guidelines for the potential expansion of legal non-conforming/non-complying uses. The

THE CORPORATION OF THE TOWNSHIP OF ASSIGINACK COMPREHENSIVE ZONING BY-LAW

General Provisions apply to all properties regardless of what zone the property is located in, unless otherwise specified.

e) Parking and Loading

[Section 5.26](#) provides the parking and loading requirements for all uses permitted in the Township. If you are considering changing the use of your property or adding a new use to your property, you should review [Section 5.26](#) to ensure that you are aware of the parking requirements for the proposed use.

f) Exceptions, Holding Zones and Temporary Uses

Zoning By-laws are not static documents and lands may be subject to a zone exception, a holding zone, or a temporary use. If a zone symbol is followed by a dash (-) and a number, the lands are subject to a site specific exception and are subject to site specific exception provisions in addition to all provisions of the parent zone and general provisions, unless otherwise stated in the exception. If the zone symbol is followed by an (H) or preceded by a (T), the lands are subject to holding symbol or temporary use.

What are Legal Non-Conforming and Legal Non-Complying for the Purposes of this By-law?

A legal non-conforming use is a use of land and/or building that legally existed on the date this By-law comes into effect under the Ontario *Planning Act*. To be legal, the use must have been permitted on the lands in accordance with the previous Zoning By-laws for the Township.

A legal non-complying building or structure is a building or structure that was legally constructed and in a location that was permitted in accordance with any applicable Zoning By-law at the time of construction. Alternatively, if the building or structure existed before the first By-law for the Township of Assiginack or the By-law for the original Township, the building or structure may be legal.

Description of By-law Components

This By-law contains seven sections which together, provide the land uses and standards applicable to all lands within the Township. These sections are as follows:

- Section 1 – Interpretation
- Section 2 – Administration
- Section 3 – Establishment of Zones
- Section 4 – Definitions
- Section 5 – General Provisions
- Section 6 – Specific Zones
- Section 7 – Enactment

THE CORPORATION OF THE TOWNSHIP OF ASSIGINACK

COMPREHENSIVE ZONING BY-LAW

The purpose of each of these Sections is described below:

Section 1 and 2 – Interpretation and Administration

These sections of the By-law specify:

- What lands are covered by the By-law;
- That every parcel of land in the area covered by the By-law is to conform and comply with the By-law; and
- What penalties can be levied against a person or corporation if they contravene any provision in the By-law.

Section 3 – Establishment of Zones

This section establishes the Zones that apply to the lands covered by the By-law. This section also describes how to determine the location of the Zone boundaries on the schedules.

Section 4 – Definitions

It is necessary to define words in a Zoning By-law because it is a legal document. A By-law must be drafted so that it can be enforced in a court of law. These definitions will help provide clarity in the By-law and ensure that the By-law and its intent are applied consistently. If a word is not defined, refer to a dictionary and apply the defined term in the context of which that word is used.

Section 5 – General Provisions

This section contains a number of regulations that apply to certain types of uses, buildings, or structures regardless of where in the Township or in what zone they are located.

Section 6 – Specific Zones

Section 6 identifies the uses that are permitted in each Zone category. The effect of these Zones is to only permit certain uses in various parts of the Township. The only uses permitted in a zone are those that are specified in the By-law. If a use is not specifically mentioned as a permitted use in a Zone then it is not permitted. Similarly, if a use is defined in Section 4 of the By-law but does not appear as a permitted use in any zone, then it is not a use permitted by the By-law.

Section 6 also contains a number of regulations that control the placement, bulk, and height of a building on a lot. This includes regulations such as minimum lot size, minimum frontage, maximum building height or the maximum coverage of buildings and structures on a lot.
